

DCS MISSION STARTER

USER GUIDE

Pick a map, an era, and an aircraft — fly a living world in minutes.
Airfields dressed. SAMs up. The strike group at sea. No waypoints, ever.

Welcome aboard

Select, don't search. The DCS Mission Starter builds a living world for you: airfields dressed with period-correct aircraft and equipment, working SAM sites, support flights on station, and a carrier strike group with a properly spotted deck. You download a ready **.miz** file and build *your* mission on top in the DCS Mission Editor.

We set the stage — you write the play. The Starter never places your waypoints. Flight planning is always yours.

The screenshot shows the 'DCS MISSION STARTER' wizard interface. At the top, it says 'Select, don't search. We set the stage — you write the play. No waypoints, ever.' with a link to 'Download the user guide'. The wizard is divided into three main sections: 1. MAP, 2. ERA, and 3. COALITION & BASING. In the MAP section, 'Caucasus' (Free terrain) is selected, with other options like 'The Channel', 'Persian Gulf', 'Nevada (NTTR)', 'Normandy 2', and 'Syria' (all Paid terrain). In the ERA section, 'Cold War (1965-1985)' is selected, with other options being 'World War II (1939-1946)' and 'Modern (2000s+)'. In the COALITION & BASING section, 'Your side' is set to 'Blue', 'Home airbase' is 'Kutaisi', and 'Aircraft (full DCS roster)' is 'A-10A'. At the bottom, there are dropdowns for 'Slots (1 = single player)' set to '1', 'Start' set to 'cold', 'Time' set to 'day', 'Weather' set to 'clear', and 'Density' set to 'normal'.

1 MAP

Caucasus
Free terrain

The Channel
Paid terrain

Persian Gulf
Paid terrain

Nevada (NTTR)
Paid terrain

Normandy 2
Paid terrain

Syria
Paid terrain

2 ERA

World War II (1939-1946)
Hard-filters aircraft, statics & SAMs to the period

Cold War (1965-1985)
Hard-filters aircraft, statics & SAMs to the period

Modern (2000s+)
Hard-filters aircraft, statics & SAMs to the period

3 COALITION & BASING

Your side: **Blue**

Home airbase: **Kutaisi**

Aircraft (full DCS roster): **A-10A**

Slots (1 = single player): **1**

Start: **cold**

Time: **day**

Weather: **clear**

Density: **normal**

The Mission Starter wizard.

Step by step

Step 1 — Pick a map

Choose your theater. Maps that don't support the selected era are greyed out.

1 MAP

Caucasus
Free terrain

The Channel
Paid terrain

Persian Gulf
Paid terrain

Nevada (NTTR)
Paid terrain

Normandy 2
Paid terrain

Syria
Paid terrain

Step 1: map selection — six theaters, era-aware.

Step 2 — Pick an era

The era is a **hard filter**: it decides which aircraft, statics, SAMs, and support assets can appear. A WWII starter will not offer a Hornet, and a modern starter will not offer a Spitfire.

2 ERA

World War II (1939-1946)
Hard-filters aircraft, statics & SAMs to the period

Cold War (1965-1985)
Hard-filters aircraft, statics & SAMs to the period

Modern (2000s+)
Hard-filters aircraft, statics & SAMs to the period

Step 2: era selection — WWII is greyed out because the selected map has no WWII preset.

Step 3 — Coalition, basing & aircraft

Pick your side, home airfield, and aircraft from the full DCS flyable roster (period-filtered). Set single-player or multiplayer slots, start type, time, weather, and world density.

3 COALITION & BASING

Your side: Blue

Home airbase: Kutaisi

Aircraft (full DCS roster): A-10A

Slots (1 = single player): 1

Start: cold

Time: day

Weather: clear

Density: normal

Seed: 1

Step 3: side, home plate, aircraft, and mission conditions.

Step 4 — Choose building blocks

Everything is optional and defaults are sensible. Each block is described in the reference table later in this guide.

4 BUILDING BLOCKS

☒ **Airfield dressing**
Static aircraft, GSE, infrastructure on real stands

☒ **Air defenses**
Complete era-correct SAM sites + SHORAD

☒ **Tanker**
Racetrack, TACAN + freq assigned

☒ **AWACS**
On station behind friendly lines

☒ **Comms card**
Non-conflicting freq/TACAN plan in briefing

☒ **Starter briefing**
Situation + contents summary

☒ **Nav chart kneeboard**
Comms card, airfield data + theater overview pages in the jet

☒ **Carrier strike group**
CVN + escorts on BRC, TACAN 71X / ICLS 11 / Link4 (blue, coastal maps)

☒ **Ambient air traffic**
AI transports starting up and flying between friendly fields

☐ **Functional FARPs**
Pads + fuel/ammo/command/comms so rearm-refuel works (helo eras)

☐ **Strike target packages**
Depot / convoy / C2 site placed in the enemy rear with trigger zones

☐ **Practice range**
Bombing ring + strafe line in the friendly rear

Step 4: the building-block toggles.

Step 4b — Configure the carrier (optional)

With the carrier block enabled, pick a hull, a real-world deck state, the aircraft spotted on deck, and optionally launch the air wing's CAP and Hawkeye.

4B CARRIER DECK CONFIGURATION

Hull: CVN-71 Theodore Roosevelt (CSG-9) — Supercarrier

Deck layout (real-world states): Recovery — LA clear, bow packed in tight rows

Aircraft on deck:

- ☒ FA-18C-hornet parked on deck
- ☒ F-14B parked on deck
- ☒ E-2C parked on deck
- ☒ S-3B parked on deck
- ☒ SH-60B parked on deck
- ☒ Deck equipment: Tugs, MJ-1 loaders, crash & salvage gear at real stations
- ☒ Launch CAP: Air-wing 2-ship on station toward the threat axis
- ☒ Launch Hawkeye (AAW): Air-wing E-2 AEW orbit covering the strike group

Step 4b: the Roosevelt with a recovery deck, full airwing, CAP and AAW Hawkeye.

Step 5 — Template pack (optional), then Generate

Pick a curated scenario or keep the pure starter, then hit **GENERATE .MIZ**. Drop the file in *Saved Games/DCS/Missions/* and fly, or open it in the Mission Editor and keep building. **Copy share link** gives you a URL that regenerates this exact starter for anyone who clicks it — paste it in your squadron Discord.

5 TEMPLATE PACK OPTIONAL

None — pure starter
You build the mission on top

Backseat Ops: IZLID Designation (F-4E, you fly the back seat)
Curated scripted scenario

Backseat Ops: GCI Intercept (F-4E, experimental)
Curated scripted scenario

Step 5: template packs — era-gated like everything else.

Syria · Modern (2000s+) · blue · A_10A from Incirlik · seed 1

[COPY SHARE LINK](#) [GENERATE .MIZ](#)

The generate bar: share link and download.

The standard comm ladder

Every starter uses the same predefined comms, so you learn the plan once. The ladder is printed on the in-jet kneeboard and in the mission briefing.

AGENCY	CALLSIGN	FREQ (UHF)	TACAN	NOTES
Guard	—	243.00	—	monitored
Your flight	(varies)	305.00	—	flight common
Tactical	—	254.00	—	inter-flight coordination
AWACS	Overlord	251.00	—	land-based E-3 / A-50
Tanker	Texaco	253.00	39Y	speeds & altitudes per type
Carrier	Mother	264.00	71X	ICLS 11 · Link4 336 · ACLS on
CAP	(squadron)	258.00	—	carrier air wing
AEW Hawkeye	(squadron)	259.00	—	carrier air wing
FARPs	(name)	127.50+	—	0.25 steps per pad

All carrier approach systems come pre-activated — TACAN 71X “STN”, ICLS channel 11, Link4 on 336, and ACLS. Tune and go.

Building blocks

BLOCK	WHAT YOU GET
Airfield dressing	Era- and faction-correct static aircraft on real parking stands, ground support equipment, fuel farms, tents, com
Air defenses	Complete, functional SAM sites with doctrinal layouts — SA-2/3/6/11, Hawk, Patriot by era and side — plus SH
Tanker / AWACS	On station behind friendly lines on the standard freqs. Not available in WWII — the era gate is strict.
Carrier strike group	A real CSG with a doctrine-spotted deck. See the next section.
Ambient air traffic	AI transports starting up and flying between friendly fields.
Functional FARPs	Pads with the fuel, ammo, command, and comms vehicles required for rearm and refuel to actually work.
Strike targets	Depot, convoy, and C2 packages in the enemy rear — each with a trigger zone ready for your own mission log
Practice range	Bombing ring and strafe line in the friendly rear.
Nav kneeboard	Comms card, airfield data, and a theater overview rendered into the jet's kneeboard.

The carrier strike group

Pick a hull and you get its **real strike group**. The Roosevelt sails as CSG-9 with USS Lake Erie (CG-70) and DESRON 23 destroyers; the Truman as CSG-8 with USS Gettysburg; the Forrestal as a 1980s Mediterranean battle group with USS Ticonderoga. Screen stations follow doctrine: plane-guard destroyer astern, AAW cruiser on the beam, pickets on the bow quarters. The group steams into wind on BRC.

Deck configuration

DECK STATE	WHAT IT LOOKS LIKE
Recovery	Landing area clear (angle, waist cats, EL4, port stern). The bow is the pack: tight uniform herringbone rows across t
Launch	Cats, JBDs, and taxi flow clear; spares spotted aft in uniform rows.
Packed	Port-visit deck. Everything fouled including the angle. No-fly.

Check the aircraft types you want on deck — rows are spotted one squadron per row, with tugs, MJ-1 loaders, and crash gear at their real stations. Optionally launch the air wing's **CAP** (two-ship on the threat axis at 25,000 ft — e.g. VFA-146 Blue Diamonds) and an **E-2 Hawkeye** AEW orbit covering the force.

Template packs

- **Backseat Ops: IZLID Designation (F-4E)** — you fly the back seat; Iceman flies the jet and Jester lases a convoy with the IZLID on a scripted timeline.
- **Backseat Ops: GCI Intercept (F-4E, experimental)** — Iceman holds CAP, GCI commits you onto inbound Backfires; you run the intercept from the pit.

Templates are the one exception to the no-waypoints rule — the AI pilot needs steerpoints to fly.

Share links and recipes

A starter is defined by its **recipe** — your wizard selections plus a seed. Share links encode the recipe, not the file: the same link always regenerates the same mission, even after DCS updates. Change the seed to reroll the details while keeping your selections.

FAQ

The mission won't load or units are missing. Make sure you own the map. Carrier decks with CVN-71/72/73/75 need the Supercarrier module; the Stennis deck works in the base game, and the Forrestal comes with the F-14.

Can I edit the starter? Yes — that's the point. Open it in the Mission Editor; everything is ordinary groups and statics you can move, delete, or build on.

Why can't I pick aircraft X in era Y? Hard era gate by service window — the Hornet entered service in 1987, so it can't appear in a Cold War (1965–1985) starter. This keeps every starter period-authentic.
